

MISSISSIPPI COCAINE SALES UPDATE

On Tuesday 21 April 1998 I spoke with a person knowledgeable about conditions on the Mississippi Gulf Coast who is able to correct this problem. I gave him information about the drug predicament on the Coast that is carried on, operated and supervised by the Harrison County Sheriff and the Chiefs of Police of Gulfport and Biloxi, as well as others not named herein, in the hopes and expectation that he could and would do something about this situation. I hope and pray that he can and will do something to clean up the drug matter and other criminal racketeering. It is not my intentions to gross anyone out who reads this, but conditions here are such that in order to understand the deviate psychopathic and schizoid mentalities of the dope dealing terrorist referred to herein, as well as to be able to deal with them, it is necessary to accurately understand them. So, when a citizen is having to deal with such people in order to protect and preserve their life, liberty and freedom as well as our heritage and Constitution, it is imperative that you fight them with any and all weapons available to you.

I related to him that Tommy Moffett, Chief of Police of Biloxi was dealing cocaine (crack) principally at Division & Main in Biloxi. I told him that he didn't have to take my word for it, to go down there to Division & Main tonight and see for himself, and while at it to drive down Hewes Ave. in Gulfport and observe the drive by situation operated there, as well as on Gaston Point, the world's largest drive by crack sales area, operated and controlled by the Gulfport Police. Everyone knows about it, and it certainly is no secret what I am relating to you here. It seems that no one in our dysfunctional government seems to know anything about this billion dollar a year illegal drug operation that has been going on for over ten years, here on the Coast, and it is Mississippi's largest industry. I told him that almost daily, people ask me what if anything, I can do to clean up this situation that has been operating since Larkin Smith was elected Sheriff. I hear complaints daily about the Gaston Point Drive By Sales Operation selling crack on the side of the street, always with the Gulfport, Mississippi Police Dept. cars standing by observing the crack sales, or either obtaining evidence against the purchasers, or to make sure that no one rips off the

street dealers, all Black youths. Nurses at the nearby Gulfport Memorial Hospital have complained to me about having to drive through there at night, going to and from work. It has been my observation that anyone who denies, or claims that they don't know about these things going on, is either part of the operation, covering up for them, or is dumb and ignorant of what is going on, in that it is unbelievable or inconceivable to them. I am of the firm belief that more than 90 % of the citizens of this County know about the cops crack operation. I might add here that anyone who denies any knowledge of this operation fits the profile of one of the Terrorist who are part of this operation. Also, it appears that many of those in a position of leadership and responsibility in government who are one of them, deny any knowledge of this operation, and don't want you to tell them anything about it and if you do, you are ridiculed and called everything from insane, drugged out, are senile, have AIDS or Alzheimer's, or are some kind of a conspiracy nut, and you should just go away and keep your mouth shut, if you know what is good for you, but when you confront them with the facts and witnesses, they sing a different tune. I have discovered that each time that I relate to a person of responsibility about enforcing the criminal laws, they thereafter conduct some sort of a raid, always at locations other than at these lucrative drive by locations, usually by kicking in the doors of those who have just driven by and made a purchase. Obviously the police in the cars parked at these areas are writing down license plate numbers for that purpose. The other police protected crack sales areas are crack houses whose locations are well known to users, and also low income apartment complexes where there is always someone outside in the parking lot selling it to tenants, or to those who drive up and buy it and leave. No area is left without its crack dealers. These charade raids follow a complaint by someone. These raids that take place a couple times a year appears to be just a cover up, or a dog and pony show put on by the law enforcement to try to deceive the public into believing that law enforcement is not part of the operation, which everyone knows is an outright cold blooded lie. If you know one of the law enforcement people, and ask them, they won't deny that they are selling cocaine, if asked directly, privately and confidentially.

On or about the 28th of April 1998 the most recent charade raid was conducted by the State Bureau of Narcotics, Gulfport Police and Sheriffs

deputies at night. This was reported by the local media. One report in the Sun Herald was that there was a stabbing on Hewes Avenue that night, obviously drug related, and that the stabbed person was taken to Memorial Hospital. No other information was reported by the media. No arrests were made at the Gaston Point area. A nurse at the hospital related to me that a DEA Agent told him that Gaston Point area was the largest drive by crack sales operation in the entire world. This is something that the Terrorist thugs in control of this State can be proud of, and can brag about. They are good at this drug dealing, murder, stealing, blackmailing, extortion, political corruption, treason and anarchy, as well as about any other crime that you want to think up, they are doing it, and are getting away with it, of course, for the time being. I am disturbed about the conditions in our Country which are immense, to say the least.

There is always a bit of humor coming out of the criminal operations of the corrupt law enforcement. This actually occurred and I will try to relate it as it was told to me. On the night of the 28th, or 29th, Chief of Police, Tommy Moffett sent some of his police officers in Biloxi down to the Intersection of Division and Main to run his crack dealers off of the street while this charade raid in Gulfport was taking place. The officer told them to leave, all did as told except one Black boy and his friend. The officer arrested one of them, the dealer, and hand cuffed him, searched him and found a quantity of crack in his pocket. This young Black boy told his buddy to get on the cell phone that he had and call "Tommy." He did, held the phone up to the arrestees ear, who told Tommy that he was handcuffed and to tell his officer to unhandcuff him and let him go. Tommy asked that he give the phone to the officer. The officer was told to unhandcuff him, let him go and to bring the crack to him personally. After being unhandcuffed, the dealer said, "See, its good to have friends and influence in high places." (or similar words to that effect) This officer should be called upon to explain what happened and appropriate action taken against the Chief of Police, for obstructing justice, if nothing else. My observation is that; Tommy has to protect his dealers, because they know too much on him, and others; second, Tommy could not allow one of his crack dealers to be arrested in that they would all loose faith in him and destroy his lucrative, multi-million dollar a year crack business down on Division and Main and most likely

cause the loss of his job. Nor could he allow a case into the court system to be made public, indicating that this man was dealing dope at Division and Main, which is undeniably the most well known location in Biloxi for drug dealing by the City of Biloxi, second only to Gaston Point in Gulfport. These thugs operating this crack racket are so stupid that they just cannot believe that there is anyone out there who would believe that they are selling drugs openly, and in such large quantities. To the contrary, there is no one out there who would believe that they are not.

Reliable information related to me reveals that Sheriff Price has a man to prepare large packages of drugs which is sent to Parchman State Prison to be distributed to the prison guards there to sell to the inmates. In simple language, Price provides all of the cocaine and other drugs that are sold to inmates at this large prison. On more than one occasion large parcels of drugs were sent to Parchman Prison on the bus that transports inmates to Parchman. The drugs are sold to prisoners there, many of whom are serving long sentences for drug offenses, much lesser offenses than what the Sheriff and Chiefs are committing. The cops are selling it to their former competitors and partners in crime who they imprisoned for doing the same thing that they are doing. Make sense?

Recently I spoke with a Gulfport Police Officer who I asked if it were not true that the cops were selling cocaine and other drugs. He stated that they were. I asked him why, and he stated that they used to arrest people on drug charges and "One of them old crooked judges would turn them loose", so they decided to just sell it themselves, which they have been doing since 1986. I told him that this was a double standard of justice, one standard for them, the cops, and one for every one else. He agreed and added, "We are the law, so who is going to do anything about it?" I must state here that there are many honest and dedicated law enforcement people who have to tolerate this situation to keep their jobs, they detest it, as well as those individuals that they have to work for, who are the principal criminals. Many officers resign, some keep silent and act dumb just to keep their jobs, and many have nothing but contempt for their chiefs, and sheriff. I once asked a police officer whom I knew what side he was going to take when the revolution started, and his reply was that all of the officers that he knew

were going to come down with the blue flu, that they would never fight against patriotic citizens and for these dope dealing superiors that they hate.

In 1988 I represented a man who was arrested, but no record made of it, by Gulfport police, for selling drugs. He was required to move into an apartment in a low rent complex. My investigation revealed that he would be in his apartment most all of the time, especially at night selling drugs provided him by his arresting officer who naturally did not ever formally arrest him, but who supplied the drugs he sold to people who were lined up at his door to buy, waiting for their turn to go in. That this dealer for the cops had a large briefcase on the foot of his bed with a .38 caliber pistol, a stack of money for change, and a large quantity of any kind of drug that the police brought him to sell. He had no worries about being apprehended. This type of thing occurred more than ten years ago and is still taking place.

Profile:

The government has a profile that is used to spot drug traffickers at airports, which is a pattern that smugglers conform to unwittingly. One indicator is that he be traveling from a city to a place like Miami, with no checked luggage, return the same day, paying for his ticket with cash, using an assumed name, a traveling companion who requests seating other than near the principal smuggler, etc. So, these dealers, terrorist thugs operating the drug syndicate in Harrison County, Miss. have their own separate profile by which they are easily identified. All of their members who you can engage in conversation about this situations do many of these identifying things:

1. They say, "I can't see why anyone would put that stuff in their bodies." This is to say, it is O.K. to sell it, so, lets not talk about the dealers, lets blame it on the user/buyers, who are the victims of this terrorist organization operating within our government. Just deflect the blame to someone else, is their policy.
2. Once I represented some Colombians who were caught smuggling drugs into this Country, before it became a de facto government operation. One of them was making fun of, and ridiculing the slogan, "Just say no to drugs." He laughed and stated that anyone who used their drugs, thereafter couldn't say "No" to it. This statement of saying "no to drugs" is utter nonsense. These drugs are highly addictive, especially

crack. Then you have the D.A.R.E. programs where law enforcement officers go to schools and lecture and demonstrate to the small children how drugs are used and show them the equipment used to ingest them. Their young and innocent minds, especially after they are told, "The choice is yours!" will inventively try it, then they are addicted, unless they are a very strong willed person. Can you conceive of an honest, dedicated law enforcement officer telling a young teenager that the choice is theirs? This places upon them, and them alone, the prerogative to make the choice themselves without being told that they should discuss it with their parents or teachers or others in loco parentis. The cops demonstrating drug use to them have these children's curiosity so aroused that they anxiously try them and usually do. It was explained repeatedly that the choice was theirs, as though you can do it if you choose, so they try it soon after the lecture, then it is too late, they can't say no to it. They are not told that their parents should have a voice, that they shouldn't make a choice in any event, especially without first getting advice about it from their parents rather than the drug dealers. In fact they shouldn't be told anything whatsoever by these dope dealing cops, recruiting young and innocent customers to buy their drugs and ruin their lives, which is obviously one of the dealers goals. The moral of this is that they shouldn't be introduced to the drug culture and told how to use it, under any circumstances. These D.A.R.E. instructors are certainly contributing towards these children becoming addicted to the drugs that they are selling. Many young student graduates of the D.A.R.E. Program try it and become customers of the dealers, their D.A.R.E. teachers, in fact some of the students in this program try it and buy it immediately afterwards from their class mates who take it to school to sell, wearing beepers so they can make deliveries during noon and after school. Many principals of these schools have ordered the deputies teaching students how to use drugs, off of the campus, and rightly so. The, "say no to drugs" and the D.A.R.E. programs were conceived by the organized conspiracy to import and sell drugs in this Country as a propaganda subterfuge. The cops teaching the students how to use drugs are the same people that are seizing it on the Interstate and having people sell it on the streets and elsewhere. Is this a conflict of interest? This "Say No" propaganda is principally aimed at school children. The

cop dealers are not interested in the future of these children, only the money and power that they gain from the proceeds of the sales. Money, Power and the Corruption of the American Citizen's children, so as to destroy the American Heritage and Christian Society, making the citizens easier to suppress and control for the New World Order that these traitors think that they will impose upon American Citizens. So, beware of supporters and promoters of D.A.R.E. and the slogan, "Just say No." Just say "NO" to the D.A.R.E. program and their teachers, most of whom are dirty cop drug dealers. This is a very clever ploy conceived by big time dealers to recruit customers. Psychologically the government is saying to our youths, "***We are resigned that cocaine sales are here to stay, so, if you don't want to use our product, just say no to it, then if you get hooked on it, its not our fault because we told you to say no to it and that the choice was yours.***" What a great psychological deception! Recently the law enforcement drug peddlers started a new scheme to destroy this Country. They demonstrate a concoction to the students which smells like marijuana smoke and they tell them that if they smell this kind of odor at their home that they are to call the number on a card given to them, and tell the person who answers that their parents are smoking marijuana in their home. What follows is that this family is destroyed by the dope dealing cops, while all the time the marijuana or other drugs used by the parents have been provided to them by the law enforcement, if that is what you want to call them. My choice of words for them is, "traitors", "dope dealers", and "thugs." Why do I refer to them as a traitor? This is most likened unto the Nazi Gestapo, having children make criminals out of their parents. Because what they are doing is destroying the fabric of our society, destroying the White, Black and Spanish Christian races of people, as well as their government, making it very vulnerable to be taken over and controlled.

3. Not one of "Them" will use the word "Cocaine" or "Crack". The government dealers would prefer to have their products described with less degradation, and not say anything about cocaine or crack, and the profile people won't discuss drug distribution with anyone for fear of offending the law enforcement dealers/distributors.
4. Not one of "Them" will discuss intelligently the drug problem and why it is so rampant.

5. All of “Them” will criticize each and every person who speaks out against drugs, and about the cops selling drugs, or they will change the subject. They will all defend those selling the poison, as well as cooperate with them in concealing their operation, even in the face of overwhelming facts.
6. All of “Them” will vote to re-elect those selling the poison, in that they are deriving some form of benefit from the elected or appointed government officials selling it, or out of fear, so they just keep quiet.
7. All of “Them” are fearful of their terrorist cocaine dealing leaders, and are fearful of the cops targeting themselves, and are therefore fearful of voicing any opposition.
8. If you relate to one of “Them” what the cops are doing they will call you, and refer to you as a liar, or crazy, drugged, or senile. They will attempt to destroy your character and credibility. It takes a very strong person to stand up and speak out about this matter, and to endure their assaults upon you, but, is this Country and our Constitution worth saving, or should we revert back to savagery and lawlessness because we are gutless cowards?
9. If you mention to “Them” about cops selling drugs, they will change the subject or say something like, “What else is new?”
10. If you mention it to a law enforcement officer that you know well enough that they are dealing drugs, and that he and most people are aware that you know what is taking place, he won’t deny it, and will probably tell you, “We are the law, so, who is going to do anything about it?”
11. The best way to know if your cops are drug dealers is to ask around about what is done with the drugs that the cops seize. The law requires that it be destroyed in the presence of witnesses. You will never find any of these nonexistent witnesses, in that it is never destroyed. How many law enforcement people do you know that would destroy a substance that has the value of cocaine, which is three or four times greater than the price of gold?
12. If you want to be called and labeled a liar, and unmercifully harassed and intimidated and demonized, just try discussing this matter of the governments cocaine operation with you District Attorney, or any other political figure in any area where the law enforcement is conducting its

cocaine sales operations. There are a few honest Sheriffs, Chiefs of Police and Prosecutors, but not where you find cocaine for sale on the streets and crack houses operating in their city.

13. Ask your judges about this matter. Discuss with him what he is doing with repeat offenders, sentence wise. Here, they are repeatedly placed under house arrest and confinement for a period of time, and the house where they are confined to, always turns out to be a crack house. He will probably tell you that the situation is so far gone that it is impossible to find a solution for it. This is true, but it could be corrected if there were someone who was willing to arrest the cops who are openly and notoriously distribution this drug. Sure it is out of control where the law enforcement are the criminals, this is called anarchy, terrorism, treason, the motive behind it is to enslave American Citizens, destroy their government and take total control of it. I have had many people, honest, fair minded citizens, including one business woman to tell me that no dope dealing cop is going to arrest her for anything, right or wrong, that she will not submit to such an unlawful arrest by a criminal. If you want to really attack them and hurt their operation, just shine the light of truth on them and expose to the public what they are doing, they cannot stand the light of truth.
14. The cops use convicts and inmates, and develop a deviate familiarity with them, for perverse reasons and purposes. I am reminded about a recent case where the Sheriff liked this prison inmate who had several felony convictions, he got the good judge that he has blackmailed and controls, to expunge all of his records. He was then released from jail, put in a sheriffs deputy uniform, gave him a marked sheriffs vehicle, weapon, and sent him up on the interstate to pull over suspect cars, search them, and if drugs were found, to take them, the money, jewelry, etc., and let them go. This convict/deputy, moved out of the jail into a house, would hijack vehicles on the Interstate and take his loot, drugs, money and jewelry home to his two live in gay, ex-convict friends, all of them used them, sold them, and while this deputy was up on the interstate working so hard to seize things, his boys were in the neighborhood burglarizing homes and selling their loot, along with the drugs, until I put a stop to it by exposing this racket. By the way, this deputy was caught by a city policeman in his official Sheriffs marked

Jeep vehicle, parked on the street, performing oral sex on a 16 year old boy. But the policeman who saw it made no report of it, or if he did, it disappeared. Power and money, as well as the conspiracy of silence goes to their head.

15. A person who is “one of them” will not discuss the fact that the Sheriff gets most all of the cocaine that he sells and distributes all over the state from seizing it and the vehicles on Interstate I-10, free of course. I am told by authoritative and honest responsible federal agents that the Sheriff seizes about one ton of cocaine per month on the Interstate. (I might add here that there are a very large number of federal agents who are not part and parcel of this treasonous operation, and will fight for what is right, fair and honest and the protection of the Constitution when the time come.) None of the seized drugs are ever reported or destroyed. No records, no accounting of any drugs seized are kept. I might add here that there have been thousands of vehicles seized by the Sheriff, they obviously were given to anyone who has a wrecker, towed away, stored in their lots, advertised in the Sun Herald as Abandoned Vehicles, which gives them a new identity, and sold, but not one citizen or law enforcement agent has found time to reveal what is happening to these vehicles which are, as well as the proceeds gleaned from their sale, the property of the County. For the first time in over ten years, the Sheriff has recently noticed a sale of seized equipment. For the first time in 10 years I have not recently seen any ads about these abandoned vehicles in the Sun Herald legal notices. Did suddenly people quit abandoning their vehicles? Where are all of those things seized in the past ten years? Why start now? Why not just keep this stuff as well? Anyway, all of the profits are free and clear from the sale of the cocaine, no Colombians to have to pay.

Who are the victims?:

Each and every honest, fair minded, hard working, conscientious, patriotic American Citizen who believes in this Country, and are concerned about preserving law and order and the Constitution, as well as, but more so, their own children’s future, are rapidly becoming tenaciously interested in this situation. It is sick, evil, and the most unforgiving thing that could occur is

for these thugs to do this damage to the citizens of this Country. That is why the upcoming revolution brought about by our government's total failure to do anything about this situation, is going to be the bloodiest in history. You can be assured that anyone who has become addicted to this product can thank their local friendly law enforcement people because they are the principal and are the exclusive and only dealers of this poison. They have a monopoly, maintained by force and violence. So, where else could one place the blame?

Blackmail:

How could such a corrupt, dysfunctional, criminal dope dealing, thieving operation be organized and put together and continue to function for so long a period of time without anyone doing anything about it? Easy! Just elect your sheriff, become his deputy and/or lawyer, act under color of, and under the protection of the law, and in violation of the law, buy you a private located, hideaway, fishing or hunting camp, and entertain your friends, and I use the word friends loosely, and have a large delicious dinner, and invite the person that you want to blackmail, own and control. One at the time, please. Have inmates there, introduced as student chefs from New Orleans, to prepare the meal, pour the wine and do other things, as well. Slip a mickey in the drink, one prepared for you to use by the doctor that you have already blackmailed. Drug your victim, have your inmates/chefs take him into the back room, undress him, and the inmates to position their nude bodies and erections in positions to make it obvious to the hidden cameras, and some not so hidden, that your blackmailee is having consensual, oral and anal sex with these inmates. When your victim comes to, dress him, show him the photos, tell him that you have got what you want and that you now own him and that hereafter he will do as he is told to do. Threaten him with his life and promise him money. You then will control him, even though he is an influential citizen, millionaire, judge, lawyer, doctor, or someone that you want to use in some illegal way, or someone you want to get out of the way, or silence. I ask what kind of criminal mentality, criminal psychopathic, deviate personality does it take to carry out such a dastardly operation as this? Would you believe anything this man tells you? Would you trust him to run your government for you? This is how the membership in this criminal, terrorist, traitorist conspiracy grows. I don't

think that they get many volunteers, especially these days. This is how you prevent one from exposing your illegal, corrupt and evil, multi-billion dollar drug operation that is ruining the lives of the children of this Country, destroying the integrity of the Country, its government, destroying our, well, everything, as well as bringing about the bloodiest revolution that the world will ever hear of, predicted to occur soon, and compared only to the Russian Revolution of 1917. I would ask, what penalty should these blackmailers suffer at the hands of the (honest) law, in the event we had law and order, which soon, I believe that we will, of course, after the revolution? I am not advocating a revolution, I am predicting one, which is ostensibly inevitable, based on the fact that those in government who can do something to clean up this mess, are not doing it, and who have both actual and constructive knowledge of what is occurring, and are therefore ostensibly, part of it. I am informed that the Militia people have identified 52 people, top level characters in government, who are responsible for the operation of this criminal drug conspiracy all across the Country, and who are targets of the Militia, and who are to be called upon to answer for their crimes, in due course. So, why don't those in government who are responsible for this, just quit it now, and avoid a bloody revolution and save this Country from destruction? The answer is greed, meanness, criminal mentality, power, as well as criminal involvement they cannot easily withdraw from. The thugs won't surrender their power and money and replace it with law and order. Nor will they allow their coconspirators and blackmailed members to withdraw from their roles in it. Therefore, it is going to take a lot of blood and guts to clean it up and turn it around, that is to say, restore law and order and the Constitution.

So, we see the corrupt law enforcement people blackmailing influential citizens in order to gain their cooperation, enslave them, and prevent them from snitching on the corrupt members of this evil conspiracy. I have learned that there is a conspiracy, a lawful one, by many of the blackmailees, who are taking the position that they will no longer continue to be blackmailed by their blackmailers, so they are taking the position, "show the pictures," and I will deal with that rather than to take their unlawful and oppressive orders and be their slaves and criminal conspirators. While on the subject, in the past years the Sheriffs Dept. has

operated a blackmail operation at the County Farm, as I am told by several different knowledgeable witnesses who are inside sources, where those not yet blackmailed by the use of sex and drugs, as well as those who already are blackmailed, are invited to the “Stables” at the County farm. As related to me, the person or honest citizen, into whose confidence one of the thugs has gotten, is invited to go up to the County Farm, told to drive back to the building behind the main building and go inside. An inmate comes in and the doors are locked, cocaine is used, followed by sex. When this is over and the guest leaves the deputy comes out and reloads the tape in the hidden video camera. This person is now a slave to the terrorist thugs. This means is also used to keep those already blackmailed contented and controllable. This situation has been so broadly revealed to the public recently, I am not certain that this is still going on or not, but the same thing has been taking place since 1987, even in the old jail. I ask how an illegal and corrupt drug dealing operation like this could continue for ten years without something being done about it? It’s members are recruited with money, drugs and sex, voluntarily and involuntarily.

Then, at this time, what we have is the Black people that the criminals in charge, use to, handle, store, package, sell and deliver, as well as purchase and use, and market on the side of the streets, as well as in apartment complexes, and any other place wherever it can be sold, crack cocaine. The Blacks who used to sell and distribute it have wised up, took video tapes, audio tapes and gotten other evidence of their masters crimes, of the cops committing felony after felony, and now the Blacks under the leadership of one man, are blackmailing their blackmailers who now have become the blackmailees, taking orders from their own dope dealers. Some of the Black organization people have photos of judges and others in high places buying it, or taking money, so they give orders to the Sheriff, Chiefs of Police, Judges, and other as to what dispositions to make of criminal as well as civil cases. (At this point I will say that in many of these driveby crack sales locations Militia people with long lens, light sensitive video cameras sit in a strategic location and photograph people buying it, and you would be surprised who some of them are.) The orders given by this new breed of dealers, all of them Black people, and professional dealers, are followed explicitly by those operating our Criminal Justice System. So now, the law

enforcement and others involved in the cocaine sales and distribution, take their orders from this Black group who have little or no education, are professional drug dealers, and are now running the County's Legal Justice Law Enforcement System. I am sure you consider this to be a dangerous situation, in fact this is terrorism stacked upon terrorism, compounded ten fold. You may say, "Impeach the bastards, kick them out of office." That is not easy to do when "They" control every one who could accomplish it, as well as the billions of drug dollars. They have the power and the money, as well as the authority of law behind them. One thing that they failed to consider is that we honest citizens have the power of God Almighty on our side, which in my opinion kind of more than levels the playing field, don't it? Is this Country ripe for a revolution? Yes!

What we have in this Country is all of the crooked, evil terrorists coming together at all levels of government taking that dirty, evil money, violating their oaths of office where they swore to uphold and defend the Constitution of the United States, and then lying about it, and destroying the greatest Country and government on the face of the earth, creating a huge conspiracy to commit multitudes of heinous crimes, and blackmailing the good guys who could, but for their being blackmailed by terrorist thugs, clean it up. So, I ask you, who is going to do anything about it? What are you going to do about it, anything? Do you have any opinion or suggestions as to how this matter should be handled, and also, what penalty the terrorist drug dealers, thieves, murderers, anarchists, traitors, and political terrorists should suffer when law and order is restored in America? If not, you need to give it a lot of thought. This is your Country, and you are charged with the responsibility of running it properly, or suffering the consequences of living in a terrorist police state.

One solution underway to clean up the drug problem that the United States Government created, and is operating, is for a posse of citizens to form a group and make citizens arrests of the members of our illustrious cocaine cartel. The problem being is that the prosecutor is also a member of the enterprise and would fail to prosecute, or will find some error of law to cause a dismissal. This impasse leads directly to revolution. None of these cop controlled cocaine dealers worry about a conviction, so, the only other

solution to save the children, our citizens, and our government from total destruction is by civilian action, by citizens, who have the courage and patriotism to make citizens arrests of our law enforcement people who are operating the cocaine enterprise and who are also covering it up, as well as aiding and abetting the criminals. Some have suggested to me that every volunteer citizen bring with them enough hemp rope (it don't stretch like nylon) with a noose tied in one end of it, and after a quick fair trial, that the sentencing and executions take place. The people in our government, both State and Federal have had an abundance of both actual and constructive notice of this criminal, treasonous enterprise operating to the detriment of the citizens and their government, and have failed totally to do anything about it. All that the President and his Attorney General, referring to both the present and previous Presidents, have to do is to order the enforcement agents to do their job, but they have wholly failed to do any thing close to this because they obviously are part of the problem rather than part of the cure. It is therefore incumbent upon we citizens to clean up our government by doing it ourselves, since all other lawful means have utterly failed. One person remarked to me that there isn't enough hemp rope or oak trees to go around, to do the job of getting rid of all of them in government, their accessories, accomplices and co-conspirators that are participating in this criminal cocaine enterprise. It's the money, as well as the conspiracy to destroy this Country, its Christian heritage, culture and government. I have learned that volunteers are lining up to do the job.

“We the people are the rightful masters of both Congress and the Courts--not to overthrow the Constitution, but to overthrow the men who pervert the Constitution.” Abraham Lincoln.

“God grants liberty only to those who love it, and who are always ready to guard and defend it.” Daniel Webster.

“Those who have long enjoyed such privileges, as we enjoy, forget in time that men have died to win them.” Franklin D. Roosevelt.
