

**MISSISSIPPI  
COCAINE SALES UPDATE No. II**

Things that should be done to clean up the drug operation conducted by criminals posing as law enforcement officials, in the event that our present de facto government finds a way to enforce the laws of this Country:

1. **RECOVER THE STOLEN SEIZED VEHICLES AND OTHER PROPERTY:** The most important and punitive thing that should be done is to force those law enforcement people who operate or have anything to do with the drug sales and distribution operation, is to require them to replace everything that they have stolen from the citizens. For the past ten (10) years the Sheriffs Dept. as well as the City of Gulfport have seized vehicles and other property and converted it to their own personal use. They have given vehicles to their friends for their loyalty in protecting this Cocaine Criminal Enterprise. Many people received these free cars, many refused to accept one. What was left over, thousands of them were given to anyone who has a wrecker, so as to make it an alibi for their stealing, who then advertise them as “abandoned” vehicles which were published in the Sun Herald in order to get a clear title to them, sell them, and apparently divide the proceeds. The scheme of things is that the Sheriff has sequestered these vehicles into the hands of others rather than to follow the law as to disposition of them. Many people have complained about this but no FBI agent or any other law enforcement officer is willing to investigate this matter, so they have stolen these vehicles, amounting to over a thousand or more vehicles. Just recently the Sheriff has advertised a sale of seized property, the first time this has occurred in over 10 years. These “abandoned vehicle” funds should be recovered and those who participated in the criminal conspiracy should be called on to answer for their crimes, and required to make restitution.
2. **There should be a strict, detailed accounting kept of all drugs, including the quantity, and other property seized and they should be kept in a separate and secure location until destroyed in the presence of witnesses, reliable witnesses.** One Judge complained to me that in several drug cases he has had to dismiss the indictment because someone

in the Sheriffs office who has access to the evidence has stolen the evidence before the trial, either sold or used it. Not only that, there should be a stop put to the future prosecution of any drug cases until the law enforcement people are no longer in the business of selling drugs, in that their doing so has essentially legalized the sale of cocaine and other drugs. There are no lawyers who are allowed to practice that have the guts to plead such a defense for a client, who goes to prison while his partners in crime, the cops still sell it.

3. **There should be a stop put to the law enforcement using inmates for illegal purposes.** An inmate told me that he and other inmates went out on the Sheriff's "Narc Boat" a seized boat named "The Trent Lott" by Sheriff Smith, to Ship Island for the weekend, along with just deputies. That no one wore any clothes, except that the deputies wore only their belts with their pistols in it, they lit their cigars with \$100.00 bills that they had seized up on I-10, all were using cocaine, diving off the boat and swimming and *partying* together all night. I did not mention this to anyone knowing that inmates were manipulated. A few days later I talked with a woman from Biloxi who has a sail boat and she related that on that Friday night they had anchored behind the "Trent Lott" yacht and that they saw naked men diving in the water, heard so much shouting, screaming and vulgarity that they pulled anchor and moved to a safer location. This confirmed what the inmate told me. This is just an example how law enforcement has become integrated with the criminal element, the only way to tell them apart is by the uniform, and that is not always accurate. I know of instances where inmates were released from jail to set up citizens on drug charges and then testify in court about it. If an inmate testifies against the law enforcement, he is called a lying convict, if he is used by them he is said to be as honest and truthful as anyone else.
4. **Stop law enforcement from selling and distributing cocaine and other drugs.** If this can be done, all other matters will be cleaned up by the citizens, in that the only driving force behind the crime is the money and power derived from the sale of cocaine. Clean up all crack houses, drive by locations and other sales locations. This can only be done by stopping the Sheriff from seizing cocaine on the Interstate and cooking it into crack and selling it all over the Country. I am told that it is even

distributed to the police of small towns in south Mississippi where it is sold on the side of the street in a drive by situation at night, and it is operated by the Mayors and Chiefs of Police in these small towns. Citizens in some of these places tell me that they know the person who intimidated their Mayor and Chief of Police into doing this and they are biding their time to set things right. If the source is eliminated, then there won't be any sales or use. We should require all of them to account for all of the drugs, and the proceeds from the sale of drugs that they seized, as well as all of the cash money that they seized, and demand restitution.

5. **Clean up the Courts** and let the judges and others know that there will be no more blackmail, payoffs, threats or intimidation. In fact the blackmail photos should be seized. Eliminate this Double Standard of Justice in the system, or put the drug dealing cops in jail, or either release from prison all persons serving a sentence for a drug violation. In the initial takeover of this County and State by the Criminal Enterprise or Dixie Mafia, as some call them, a drug dealer that I had once represented, told me that he was delivering cocaine for Sheriff Larkin Smith to anyone and everyone that Smith wanted to have them, for whatever reason, such as blackmail, destruction of that persons life and character, demonizing his (their) enemy, or to control them or eliminate them. This man told me that the Sheriff told him to give to this young lawyer, free of charge, all of the cocaine that he wanted, and to give him the best that they had. The dealer asked the Sheriff why he was doing this in that this lawyer was a friend of his. The Sheriff told him, "I just want to f--- with old -----." He was referring to this mans father. This young lawyers life was ruined by this psychopathic, dope dealing Sheriff. The dope dealer had more character than the dope dealing Sheriff.
6. **Re-open and expose the real killers of Judge Vincent Sherry and his wife Margaret, as well as other unsolved murders.** Identify the real killers, their motives, the ones who conceived and had carried out these dastardly murders and had the purpose and motive to have it done. Their motives, and the drug racket brought it about and made it necessary to kill them in order to make their cocaine empire a success. (Read the transcript of Judge Sherry's remarks in the case of *State v. Oliver Patton*, Circuit Court of Harrison County), which is very revealing when he sentences Patton for crimes that he had not ever been arrested or

indicted for, and for an inordinate sentence, being the sentence that the District Attorney recommended and which Judge Sherry knew that his unreasonable sentence he was forced to hand down, would never survive an appeal, because he deliberately conceived it that way. Judge Sherry asked Patton if he had ever used drugs and he replied about ten times he had smoked some in a cigarette with friends. So Judge Sherry sentenced him to serve two years for each occasion, keeping in mind that he had never been arrested or indicted for this. This was his subtle message to anyone who would hear him and try to intimidate or influence him. This inordinate and illegal sentence was intentionally and deliberately done by the Judge so that on appeal, where one might find justice, that this sentence could be set aside. Judge Sherry then told Patton to get him a good lawyer, which he did. Patton died a suspicious death in Parchman Prison before this appeal could be heard from both State and Federal Courts. Patton had refused to continue operating as a cocaine courier for Chief Moffett. A very sad commentary that reveals why the Judge was eliminated and later, Mr. Patton, to silence them both and protect the Cocaine Enterprise operated by the government. The Judge and his wife, Biloxi City Councilwoman were eliminated because they were called by Sheriff Smith, "smoking cannons" that could not be trusted and would blow the whistle on his cocaine operation. On the night of their murder inmates were taken from the jail, rumors were that they drove the cars that were used as a diversion, one found burned in the woods, one found parked at a parking lot of an apartment house near the Sherry home. One of the inmates taken from the jail early that night and returned about midnight is said to have driven the stolen car that was found at the apartment house, his wife lived there with his child. This was a large, well organized operation that involved many witnesses. A former FBI Agent told me that when it is finally solved, that it will involve more than a hundred people. Lots of preparation went into their murders. An inmate serving time for murder was given a weeks leave to "visit his sister in Biloxi" leave starting Monday before the murders and ending the following weekend. The only conceivable reason was diversion. The inmate population were told, before noon of the day that their bodies were found about 9:30 a.m., on instructions from Sheriff Smith, that they were killed by an out of State hit man, and that it would

never be able to be solved. He obviously knew who the hit man was. Another FBI source is that one of the killers, shooters who was in the house at the time of the murders was given \$30,000.00 in cash that Smith had seized up on I-10, and 30 pounds of cocaine, worth over \$500,000.00 also seized on the Interstate, to kill them, and promised him that he would never be prosecuted. The question is, who is the director of this gigantic operation which is the largest industry in Mississippi? Everyone knows who he is, nothing is secret anymore. It is also noteworthy that soon after these two assassinations that Mississippi Air National Guard C-130s began flying cocaine into Gulfport by the tons.

7. **Prosecute elected and appointed officials for violating their Oath of Office, taking of bribes, stealing and influence peddling, obstruction of justice, political corruption and racketeering.** At the present time there is one man, a lawyer, who is the director and overseer of the entire drug and corruption operations in the State of Mississippi, particularly in Harrison County. He is so full of evil and greed that he cannot see the handwriting on the wall, or distinguish right from wrong.
8. **Solve murders that these thugs have failed to do because they are the murderers.** I have quoted Pogo, as long ago as 1988, which states, "*We have met the enemy and they are us.*" There has been a murder revealed to me that should be solved. You don't have anyone to appeal to, to solve it because *they* control all of the law enforcement and the courts that could solve it. I will not reveal the facts that were related to me in writing, but would be agreeable to relate them to the U.S. Attorney. It is an explosive case, to say the least. More and more people are getting very concerned about this case not being investigated and solved, which can easily be done.
9. **Recover the stolen and laundered drug money seized by the Sheriff.** The (\$20,000,000.00) Twenty Million Dollars that was seized on Interstate I-10 and stolen by Larkin Smith should be recovered and deposited in the County Treasury. This is only one incidence.
10. **All vehicles and or the money received from the gift or sale of them should be recovered and placed in the County Treasury.**
11. **There should be no more charade raids of the wrong dope dealers,** in that somehow they mistakenly raid only the users and those who are perpetually used to being arrested on such occasions, as the paper

reported, one person arrested had been arrested seven (7) times, after each arrest he was confined to house arrest at his house, a crack house. The public, or citizens are no longer fooled by this kind of thing, because they know the truth. All of those arrested should be released in that the local and state government have legalized cocaine by “custom and usage”, as well as the defense of selective prosecution should be invoked because the arrestees were selected for prosecution and the dope dealing law enforcement people arresting them were the distributors of the cocaine that they were arrested for selling or possessing. Wow, what a case this would make if there was a lawyer who were not blackmailed, or otherwise controlled by drugs, money, and fear, that would have the strength and courage to tackle such a case, of course, today, at his own peril.

I predicted nine years ago that this criminal conspiracy would self destruct, in that they would devour each other, they are so evil, and then things would eventually return to normal. One reaps what they sow. What goes around, comes around. We have now the cocaine dealing sheriff and chiefs being blackmailed and controlled by their lesser lights, that they previously used to warehouse, cook, package sell and deliver cocaine. Now the cops are the mules taking orders from them. What a scary situation to say the least. Is this destruction of this Country or not? Joe Price has not been seen in public or on TV hardly at all since he was accused of having oral sex with a young white male in the front seat of his sheriffs car parked on the street. This is from close inside sources and it hit the street and spread over the County almost overnight. Years ago I heard him say, after someone saw the news reporters leave the building, and told him that they were going to write a story about him. He replied, “They ain’t nothing down there but a bunch of old queers and lesbians.” Who is calling who what? So, we see what goes around, coming back around. The big boss can’t get his sheriff’s deputies and other to do his dirty work anymore. Deputies resign right and left, inmates are used for every purpose know to man, then some. There is much dissension in the ranks of all law enforcement departments. Just recently the man who cooks the Sheriffs cocaine into crack to be sold on the streets overdosed, had a stroke and was taken to the hospital where he later died of another overdose of cocaine, there in the hospital, which is owned by the

City of Gulfport. They tried to keep it a secret, but there are too many Patriots everywhere now, for that to happen.

I have been told that the Biloxi operation's distribution of funds from cocaine sales, that they purchase land and then give a deed to the recipients of the drug sales proceeds. I am informed by reliable sources that many deeds have been filed at the Biloxi Courthouse conveying land to the Mayor and/or in the names of children and relatives, or other designee straw men. I have not checked it out but I consider my sources reliable. I am told that most of the land is in the names of children, family members and relatives. The same situation exists in the Gulfport Chancery Clerk office where conveyances are made to a person in the name of a child or relative, or other straw person. One clever ploy being use to prevent one from finding the conveyances is that the grantee on the deeds is often deliberately misspelled so that one cannot find it when you enter the grantee's correct name in the computer. It don't show up and you can't find it because of the deliberate misspelling of the grantees name.

Blackmail is done in a highly skilled manner using lots of heretofore unheard of, high tech sleaze tactics. The person is usually invited to the fishing camp for dinner, as was the Director of Customs, which I will use as an example of how it is done, in that this was related to me by an eyewitness. The Director was invited down from Washington by Sheriff Smith. Wined and dined, given a drug provided to him by a doctor previously blackmailed, taken to the back room which was wired with pinhole video cameras, inmates undressed him, engaged in both oral and anal sex while others took photos. It was related to me that after the Director was brought to and dressed, he was brought out and shown some of the photos by Smith and told, **“You son-of -a-bitch I have got what I want and you are going to do as I tell you to do. You are going to give me all of the information about drugs and money coming through my county so I can seize them before Customs does and in return for you doing that I am going to give you your mother f-----g life, and money, do you understand me you son-of-a-bitch?”** Well, not more than a few days later Smith got information about money coming through from Los Angeles to Miami, in the amount of \$20,000,000.00, yes, Twenty Million Dollars. Of

course Sheriff Smith is deceased but he was at all time acting as the alter ego of his superior, who I will let you figure out who he is who controls the entire sordid evil mess. Inmates counted it, Smith took it home with him, buried it in two safes in the floor which had been installed by inmates. Laundered it for 50 to 60% on the dollar to local business men. Many business men got all they wanted of it, and it is suppose to belong to the County, lawfully speaking. The way it was laundered was that the buyer, in one instance, bought land valued at 50% of the funds received, deeded it to a straw man that he was told to convey it to. One inside source told me that every one in the County that wanted some of it, got some of that money. This is just an example of one out of many such instances. This money is rightfully the property of the State, and could be recovered from the recipients of it.

One instance revealed by an inside source related that a deputy pulled over a vehicle on the Interstate and found \$800,000.00 that he seized, brought to the jail work center where they kept the male prostitutes that they used for blackmail, and every other conceivable purpose, including counting money, and Sheriff Price was called. He instructed that no reporters were to see it until he got there. He came to the work center and asked how much was there. The deputy told him it was \$800,000.00. Price is said to have counted out \$500,000.00 placed it in a box and carried it out with him and told the deputy that he could now let the reporters see it. The deputy asked him, as he walked out with it, if he was taking that home with him, and he responded, "Yea, it don't hurt to skim a little off the top." This information was told to me by two reliable inside sources.

Whoever it is that is the top ultimate beneficiary of this large multi-billion dollar a year operation apparently don't know what evil and cruel burdens and impositions that he is placing on the citizens of this County and State, the destruction of this Country, the lives that have been ruined, the wrecking of the economy, as well as many peoples lives, by this kind of money being drained out of the State, and the citizens are wise and angry, and ready to clean it up. I don't know who it is that is trying to put forth their opinion that no one is aware of what is going on, but that is a very stupid assumption for any of the thugs to take. If one thinks that I know lots, you need to talk

to citizens and honest law enforcement officers who are agreeable to talk, but only to ones that they trust explicitly. I am just one person who is speaking out, hopefully to the right people who can and will do something about it.

I was told by a woman who lives one house down from a crack house, about this crack house. No one will live in the houses on each side of the crack house because of noise, shootings, heavy traffic, etc. The road there was very bad, in fact the school bus got stuck one rainy morning and had to be towed out, and this was the only street that was this bad. It purposely was not repaired until this woman finally complained. She related that she knew the man who operated the crack house, that cars went and came at all hours of the night. One night she saw about a dozen police cars, Sheriffs and City there, a helicopter overhead shining a bright light down on the area. All the neighbors waited to see when someone would be brought out handcuffed, but that never occurred. So, after the raid was over and the cops left she saw the owner and asked if anyone was arrested and he told her that no one was, that they called ahead of time and told him to hide his dope and money and that they had to pull a raid. After the raid, the cars started coming again and things were back to normal. She and her granddaughter were in the living room one night and bullets began to come through the glass window. They ran in the other room and got down on the floor. She built a chain link fence around her house, then a customer from the crack house ran his car through her fence, into her bedroom doing \$30,000.00 worth of damage. I wrote to the Justice Dept. about it, no response. Then two Gulfport Police officers in plain clothes called at her home and asked about her complaints. She told them. They told her that when the shooting started to lay on the floor. She told them that they already are doing that automatically, but that they shouldn't have to. They said that was all that they could do for her. She asked them why they couldn't send in an undercover man to make a case and close the crack house. They told her that they couldn't do that. They left. The crack house is still in operation, the city fixed the street surface.

The solution is to stop Joe Price and his boss, and all of the others involved, from seizing it on the Interstate or obtaining it elsewhere, and selling it and

there won't be any of this drug devastation. I ask, why is that such a problem to solve, it's been going on for over 10 years now? The answer is the money involved, the power, and most of them are power crazy. They will continue to try to devastate any individual who tries to stop them. They forget that there will be a tomorrow.

I have asked many Militia leaders across the Country why they don't do something to stop this criminal enterprise and I have been told repeatedly that they have resigned to just let them go, give them all the rope that they want, figuratively speaking, and let them do it, but document it in detail, names, dates, places and distribute these lists of names across the Country and when the revolution comes and law and order is restored again, that justice will then prevail. "Don't worry about it now, just make your lists, our day will come soon enough." they tell me. I would prefer to see our own citizens restore their own government in a peaceful manner, but I am afraid that is impossible. Just read your history.

The citizens are aware of most all of what I have related here, and much more, but they are not open with it as I am, they just relate it to their friends and neighbors that they trust explicitly. These anti-corruption, patriotic citizens have kept quiet and gone underground to avoid retaliation by the thugs, and the Patriots are growing in numbers daily, arming themselves to the teeth and dare the government to try and take their weapons. This Country is in a very volatile state, and as I am learning, a bloody revolution could erupt at any time, it is just that it will take a catalytic event by the de facto government to precipitate hostilities. The Militia people say that they are waiting for the government thugs to make that first move. I have tried to be open and candid about this matter that others are fearful to talk about, or even to report to their U.S. Attorney, or anyone else in authority, not knowing who to trust and also fearful of retaliation. This Country was worth me fighting for in 1944-5, and it is still worth saving, and fighting for again. Anything is worth the elimination of the thieving, murdering, dope dealing, terrorist, blackmailing, thugs from our midst, so that we can once again try to enjoy life, liberty and the pursuit of happiness.

**The Charade Raids:** These raids do not fool any of the citizens. They know what is going on, who is doing it, and why. It is only making things worse for the thugs. The Citizens know who is responsible for it and they are making their lists also. People are reluctant to discuss what they know with anyone they do not know well. Just like the Nazi occupation of France in W.W.II. There are many police officers, and deputies, honest ones, who are going to tell the truth about what is taking place when the time comes and it is safe to do so. These people have lots to say and in time will have the courage to say it. Chief George Payne goes on television after the last charade raid, referring to the same old song and dance routine that it is impossible to stop these Black people from selling crack, but everyone knows that if Payne and Price didn't provide it to them to sell, then there wouldn't be any to sell. Payne had to deny it, and lie about it, pretending that he don't know what is going on and can't do anything about it which no one in their right mind believed. Ask him about his million dollar cattle ranch that he owns in George County. He made himself the laughing stock of the Gulf Coast. The solution then, is to get rid of Payne, as well as Price, and all of the other coconspirators, accessories, collaborators and lesser lights, what ever it takes, in order to save this Country, has to be done. Joe is too embarrassed to face the people, so Payne did the appearance on television after the last charade raid. No one that I have talked to believed a word he said. Does the FBI have instructions not to interfere with this operation? Why is it that they know less than anyone else, and that they are always pursuing those who are complaining about this manifest corruption, and never pursuing the criminals. Who in Gulfport do they take their orders from? Why is it that they claim to know so little about these racketeers and their rackets? Why aren't they investigating them? Why aren't they arresting them? Why aren't they releasing to the public what is occurring in this area? What can be done, if anything to get the Justice Department to clean this mess up? Are they afraid of these thugs, or are they part of their operation? Are the Citizens themselves going to have to do it? If so, I fear for many people, and I predict that it will be likened only to the Russian Revolution, and just as bloody, or worse.

If I can be of any assistance to anyone with the power and authority to do something about this terrible situation, and is determined to clean it up, then I offer my services.

*“It is in vain, Sir, to extenuate the matter. Gentlemen may cry, Peace, Peace! But there is no peace. The war is actually begun! The next gale that sweeps from the North will bring to our ears the clash of resounding arms! Our brethren are already in the field! Why stand we here idle? What is it that Gentlemen want? What would they have? Is life so dear, or peace so sweet, as to be purchased at the price of chains and slavery? Forbid it, Almighty God! I know not what course others may take, but as for me, give me liberty or give me death!” Patrick Henry in his famous “The War Inevitable” speech, March 1775.*

*“Never turn your back on a threatened danger and try to run away from it. If you do that, you will double the danger. But if you meet it promptly and without flinching, you will reduce the danger by half. Never run away from anything. Never!” Winston Churchill*

**END**
